2022-2023

## Tiger's Day celebration

The aim of the day is to raise awareness among individuals, organisations and government about the importance of the conservation of tigers.

The world celebrated international tiger's day or global tiger's day every year on July 29. International Tiger's Day is observed to mark the declining population of tigers across the globe. The decline happened in 20<sup>th</sup> century and the number is luckily rising again due to the continued efforts of the people. India prepares the tiger estimation report every four years and the last report was released in 2018.

Tiger is a striped animal. It has a thick yellow coat of fur with dark stripes. The combination of grace, strength, agility and enormous power has earned the tiger its pride of place as the national animal of India.

Tiger depends on forest. Forest depends on tiger. Tiger play an important role in order to maintain balance in the eco system.

The food web is incomplete without them.

Eg: Plants – deer – tigers.

The tiny tots participated in the event by selected dress code by the teachers. Teachers of Pre-Primary created the jungle by original plant and leaves to show the house of tiger live in the jungle and later tiny tots wire showed the short movie of life lived by the tiger and pictures of tiny tots and the teachers were taken with the background of the board which was created related to tiger days celebration. Tots

prepared Tiger's mask. They were excited to wear. The tots enjoyed a lot with happiness and learnt that we need to save the life of the tiger.
